CPD Title	Precision vs Comfort in Air conditioning systems

As world leaders in the design and manufacture of proven reliable, high efficiency and low cost operation air conditioning systems for use in both the Data centres, Industrial and Commercial sector, our background speaks for itself. Here at STULZ we are now pleased to offer our latest free CPD on Precision vs Comfort in Air conditioning systems.

This CPD takes a look at the main differences between the two types of system, the correct application on which to apply them and why you would pick one type of system over the other.

This seminar, accredited by CIBSE can be held either here at the STULZ UK head office or, depending on numbers, at your own premises and last around 1 hour.

Agenda:

- What do we mean by Comfort Air Conditioning?
- What do we mean by Precision Air Conditioning?
- Differences in Space Temperature/Humidity
- Maintaining Room Temperature
- Maintaining Room Humidity
- Drawbacks if we fall out of "range"
- Sensible vs Latent, What's the difference? And does it really matter?
- Runtime
- Airflow and Filters
- Installation and Customisability

This CPD seminar is tailored to suit planners, contractors, consultants, building services engineers as well as industry professionals. Interested? Contact Martina Burger using the information provided to register your interest and to arrange a booking.
