CPD Title	<b>F-GAS regulation: how to deal with it</b>

As world leaders in the design and manufacture of proven reliable, high efficiency and low cost operation air conditioning systems for use in both the Data centres, Industrial and Commercial sector, our background speaks for itself. Here at STULZ we are now pleased to offer our latest free CPD on F-GAS regulation.

The F-GAS regulation has a long-term plan to reduce the effects on the environment of refrigerant related systems. This CPD covers what the regulation is about and how it has been included into European and UK law. It covers what is the long-term plan and how this is will effect manufacturers and end users. It also looks at what you could look at for future proof solutions.

This seminar, accredited by CIBSE can be held either here at the STULZ UK head office or, depending on numbers, at your own premises and last around 1 hour.

### Agenda:

- Introduction
- The history in short of refrigerants
- What is an F-GAS
- New F-GAS regulation. What changes?
- How does this affect us?
- Alternatives
- Conclusions

This CPD seminar is tailored to suit planners, contractors, consultants, building services engineers as well as industry professionals. Interested? Contact Martina Burger using the information provided to register your interest and to arrange a booking.
