CPD Title	Free cooling for chilled water applications

As world leaders in the design and manufacture of proven reliable, high efficiency and low cost operation air conditioning systems for use in both the Data centres, Industrial and Commercial sector, our background speaks for itself. Here at STULZ we are now pleased to offer our latest free CPD on Free cooling for chilled water applications.

A detailed presentation of technical concepts in a Free cooling chiller. it covers an introduction to different type of systems, the main characteristics and the behaviour of a typical system in different outdoor conditions as well as an overview for all the components of the chiller analysing the most important aspects to look after when selecting a chiller.

It includes an interesting case study with an extended energy consumption analysis in London, explaining the importance of focusing on specific aspects such as efficiency, reliability and quality when selecting critical application chillers

This seminar, accredited by CIBSE can be held either here at the STULZ UK head office or, depending on numbers, at your own premises and last around 1 hour.

Agenda:

- Introduction
- The cooling requirement all year around
- Different solutions, different outcome
- Three different behaviours changing outdoor temperature
- The main components in a free cooling chiller
- The basis for a correct energy calculation
- Economic figures in a real case
- Conclusions

This CPD seminar is tailored to suit planners, contractors, consultants, building services engineers as well as industry professionals. Interested? Contact Martina Burger using the information provided to register your interest and to arrange a booking.
