CPD Title	Ultrasonic humidification

As world leaders in the design and manufacture of proven reliable, high efficiency and low cost operation air conditioning systems for use in both the Data centres, Industrial and Commercial sector, our background speaks for itself. Here at STULZ we are now pleased to offer our latest free CPD on Ultrasonic humidification.

Humidification is a requirement for many applications. Many technologies and solutions are available in the market. This CPD looks at understanding a psychrometric chart, looks at Ultrasonic humidification technology and explains how it works with some technical guidelines on the application and a quick comparison against other technologies in terms of energy efficiency and thermal behaviour.

This seminar, accredited by CIBSE can be held either here at the STULZ UK head office or, depending on numbers, at your own premises and last around 1 hour.

Agenda:

- Introduction
- Why is humidification important
- Understanding a psychrometric chart
- Practical examples
- Ultrasonic technology and its applications
- Water quality and RO plant
- Case study
- Regulation in brief
- Conclusions

This CPD seminar is tailored to suit planners, contractors, consultants, building services engineers as well as industry professionals. Interested? Contact Martina Burger using the information provided to register your interest and to arrange a booking.
